APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
10/591,626	09/05/2006	Toshiaki Kawashima	S015-5846 (PCT)	3315
7590 08/14/2009				
Bruce L. Adams Adams & Wilks 17 Battery Place Suite 1231 New York, NY 10004			EXAMINER SCHEUERMANN, DAVID W	
			ART UNIT 2834	PAPER NUMBER
			MAIL DATE 08/14/2009	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/591,626

Applicant(s)

KAWASHIMA, TOSHIAKI

Examiner

DAVID W. SCHEUERMANN

Art Unit

2834

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 July 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 2, 5, 6 and 12-24 is/are pending in the application.
- 4a) Of the above claim(s) 2, 5, 6, 14-16, 19-21 and 23 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 12, 13, 17, 18, 22 and 24 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on _____ is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 12/29/2008
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date: _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Election/Restrictions

Acknowledgement is made of the election without traverse in the paper filed on 7/2/2009 of Species I (Figs. 1-4); and claims 1, 12, 13, 17, 18, 22 and 24 as being readable on the elected species.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 12, 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Veillette, US 3937533. Veillette, US 3937533 shows:

A magnetic bearing device, (unless otherwise noted see marked up figure 2 below)

comprising:

a rotor: (14, see figure 1)

a plurality of electromagnets (N1, N2) for controlling a radial position and/or an axial position of the rotor;

a power source (E, see figure 2) for supplying power to the electromagnets;

a common node (64b, see figure 2) commonly connected to each one end of the electromagnets:

switch means (T2, T5) for switching a voltage of the common node (64b, see figure 2);

and excitation control means (T4, T6) for controlling excitation of each of the electromagnets by a supply current supplied from the other end of one of the electromagnets to a negative electrode of the power source, or by a regenerated current regenerated from the other end of one of the electromagnets to a positive electrode (via D1, D3) of the power source;

wherein the switch means includes:

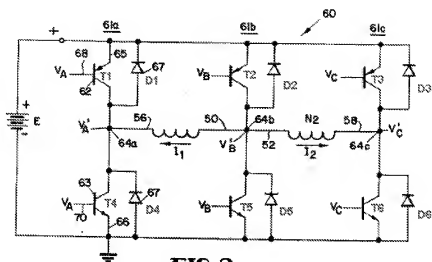

a first switch element for connecting and disconnecting between the positive electrode (T2) and the common node (64b, see figure 2); and

a first rectifier element (D5) for causing a current to flow from the negative electrode to the common node (64b, see figure 2); and

the excitation control means includes:

a second switch element (T4, T6) for connecting and disconnecting between the other end of one of the electromagnets and the negative electrode; and

a second rectifier element (D3, D1) for causing a current to flow from the other end of one of the electromagnets to the positive electrode.

**FIG. 2**

Re claim 12, see figure 3.

Re claim 13, note that D5 is in parallel with T5 as shown in the figure, supra.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Veillette, US 3937533 in view of Boon et al., US 5227948. Veillette, US 3937533 discloses the invention substantially as claimed as set forth in the rejection of claim 1, supra. Veillette, US 3937533 does not expressly disclose, "... comprising current detecting means for detecting a value of the current when a constant current is caused to flow through the electromagnets." and "... wherein the current detecting means includes a resistance having one end connected to the negative electrode, and a detection portion for detecting a current flowing through the resistance.". Boon et al., US 5227948 discloses use of a current sensing resistor R4, see figure 4 for the purpose of providing a feedback signal. At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to use current sensing resistor in the device of Veillette, US 3937533. One of ordinary skill in the art would have been motivated to do this to provide a feedback signal to the controller.

Claims 22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Veillette, US 3937533 in view of Omori, US 6644938. Veillette, US 3937533 discloses the invention substantially as claimed as set forth in the rejection of claim 1, supra. Veillette, US 3937533 does not expressly disclose, "...wherein the rotor has rotary vanes and a rotor shaft placed at the center of the rotary vanes; and each of the electromagnets levitates the rotor shaft by a magnetic force." Omori, US 6644938 discloses the combination of a turbo molecular pump and magnetic bearings, for the inherent purpose of reducing operating friction and contamination of the pumped fluid.

Art Unit: 2834

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to use the device of Veillette, US 3937533 to support the pump of Omori, US 6644938. One of ordinary skill in the art would have been motivated to do this reduce rotational friction and contamination.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID W. SCHEUERMANN whose telephone number is (571)272-2035. The examiner can normally be reached on Monday through Friday from 8:00 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Quyen Leung can be reached at (571) 272-8188. The fax phone numbers for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
